1. About the Host

Antai College of Economics and Management (ACEM) of Shanghai Jiao Tong University (SJTU) boasts a long history, traced back to 1901 when Nanyang College offered a special class on economics. In 1918, the school set up the Railway Management Department, pioneering the management education of Chinese universities. In 1931, the school expanded to establish the first management college in China and Asia. From 1949 to 1952, the school contributed its management discipline to the entire nation during the nationwide restructuring of colleges and departments. Since its re-establishment in 1984, the College has consistently kept pace with the reform and opening-up policies and the development of the times, achieving remarkable success in talent training, discipline development, academic research, decision-making consultation, international exchanges, etc. As a result, it has steadily ranked among the top-tier business schools in China.

Standing at a new starting point for development, the College will adhere to the growth strategy of "two types of scholarship, horizontal (academic) and vertical (industry), reinforcing each other and connecting theory with practice", and focus on both industry research and technology-based finance as twin drivers, with Shanghai, Shenzhen, and Singapore as the three major pillars. The College remains steadfast in building a world-class business school rooted in China.
